Objectives

Motivated Computer Science student (graduating 2026) seeking an entry-level software development role. Eager to apply strong programming fundamentals, hackathon-honed problem-solving skills, and freelance experience to build scalable applications and grow with a collaborative team.

Education

Bachelor of Science in Computer Science
University of Southern Philippines Foundation, Lahug, Cebu City, 6000
Graduated in 2026

- **Dean’s Lister** (2022–2024)
 - **Relevant Courses:** Data Structures & Algorithms, OOP, Database Management, Web Development, Software Engineering
-

Skills

- Proficient in modern frameworks and technologies including React, Node.js, Express.js, Next.js, Laravel, and .NET Framework.
 - Experienced with MySQL and PostgreSQL database management.
 - Strong understanding of algorithms, data structures, and software development methodologies.
 - Excellent communication, problem-solving, and analytical skills.
 - Familiar with cloud computing (AWS) and version control (Git).
-

Projects

GAZBEAT — *Product Service Platform with Inventory Management*

Live site: gazbeat.com

- Built a full-stack product service website for energy solutions and a mini-mart catalog using Next.js, Node.js, and a relational database.
- Developed a secure admin panel featuring authentication, product/inventory CRUD operations, and real-time stock level tracking.
- Designed responsive front-end for discovering products and services without a checkout flow, focusing on lead generation and information delivery.

BUY@NDBUILD — *Property Marketplace*

- Live site: buy-nd-build.vercel.app
- Engineered a full-stack real estate platform connecting buyers, sellers, and agents with property listings and a portfolio tracker.
- Implemented a role-based admin panel for managing listings, verifying agent profiles, and overseeing user activity.
- Leveraged React, Express.js, and PostgreSQL; deployed on Vercel for scalable hosting.

YEA! — *AI Virtual Try-On & Style Rating App*

- Live site: yeai.vercel.app
 - Created an AI-driven application using Next.js and a computer vision API, allowing users to upload photos, virtually try on outfits, and receive style scores.
 - Built image processing pipeline and integrated a pretrained model for garment transfer, emphasizing UX polish and real-time feedback.
-

Achievements:

- 3rd Place in HackEstate Hackathon Competition (PropTech Filipino Homes)
 - 2nd Place in Hackathon Competition in CCS Days at USPF 2023
 - Best in Logo and Most Promising in Hackathon Competition 2023 □ Represented the USPF in the CESAFI Computer Quiz Bowl 2025
 - 2nd Runner-Up & Best in Collaborative Catalysts – Philtech Innovathon 2026
 - Top UX Interface – PropTech SinulogFest Hackathon 2026
 - Level 3 (Competent) Achiever – TOPCIT (Test of Practical Competency in IT) Examination
-

Certifications

- **NCII in Computer Systems Servicing**
- Certified by TESDA, validating skills in hardware and software troubleshooting and maintenance.
- **TOPCIT Level 3 (Competent) – Test of Practical Competency in IT**
- Recognizes practical IT skills across software development, algorithms, database management, and system design.
- **JavaScript 101: Learn JavaScript from Scratch – MISTCONNECT (PRC Accredited CPD Provider)**
- Completed 8 hour training via Zoom (July 8–9, 2023) covering JavaScript fundamentals: variables, operators, control flow, loops, functions, and arrays.
