OBJECTIVES

Full stack developer with 2 plus years of hands on experience building web and mobile applications, eager to grow within a collaborative team environment. Comfortable following coding standards, applying feedback, and contributing to assigned features under guidance. Strong foundation in debugging, testing, and clean code practices, with a genuine track record of building real, working projects independently and learning new tools quickly.

SKILLS

Languages: JavaScript, TypeScript, Python, Go, C#, PHP, Java
Frontend: React, Next.js, React Native, responsive web design
Backend: Node.js, Express.js, Laravel, FastAPI, RESTful APIs, webhooks
Databases: PostgreSQL, MySQL, Redis, Supabase, Neon, Firebase
Cloud & DevOps: Docker, AWS (ECS, S3, Lambda, RDS), Render, CI/CD (GitHub Actions), Git
AI Integration: Gemini AI, Claude (Haiku & Sonnet), LangChain, prompt engineering, structured LLM output design
Practices: Test driven development (TDD), Agile/iterative development, code review, debug

EXPERIENCE

Full Stack Developer, Buy@ndBuild (Contract) May 2025 to Mar 2026
Cebu City, Philippines

- Contributed to the design and delivery of a real time logistics dashboard, working across the full tech stack
- Helped deliver a production application handling live operational data, from design through deployment
- Coordinated with stakeholders and followed through on assigned technical tasks and delivery timelines

Full Stack JavaScript Developer, Self Employed (Freelance) Feb 2024 to Nov 2025
Cebu City, Philippines

- Built and maintained production web applications across multiple client projects, sustaining 99.9% uptime
- Built and consumed RESTful APIs and webhook integrations to connect third party services and automate workflows
- Diagnosed and resolved production issues through systematic root cause debugging
- Delivered features under real deadlines through direct client collaboration

SAP ABAP Trainee / Program Delegate, Accenture Technology Academy Feb 2026 to Apr 2026
Cebu City, Philippines

- Completed a 320 hour intensive SAP ABAP bootcamp as a selected program delegate
- Gained hands on experience with enterprise application development and customization

EDUCATION

Bachelor of Science in Computer Science - University of Southern Philippines Foundation, Graduated 2026
Dean's Lister (2022 to 2024)

PROJECTS

SugboWay — AI Powered Public Transport Navigator

- Built a routing backend using graph based pathfinding with a traffic aware congestion cost model
- Built a React Native mobile app with offline first support for low connectivity areas
- Integrated Gemini AI for a conversational route planning assistant
- My contribution: sole developer, built the entire system end to end

The Atelier — AI Fashion Judge & AR Try On PWA

- Built a full stack PWA combining real time AR body tracking with generative AI outfit analysis
- Debugged and resolved a coordinate mapping issue between video display and body tracking data
- Learned and applied database migration practices, moving a live database between backend platforms without downtime

- My contribution: sole developer, built frontend, backend, and AR pipeline

TrueFit — Universal AI Product Matcher

- Built a multi-marketplace product search tool that normalizes listings from different platforms into one common format
- Learned and applied weighted scoring and A/B testing concepts to rank search results
- Integrated Claude for review sentiment analysis and plain language explanations of search rankings
- Practiced test driven development, writing tests before implementing each feature
- My contribution: sole developer, built the system independently as a self-directed learning project

Library TPC — School Library Management System

- Library TPC — School Library Management System
- Designed a relational MySQL schema for book inventory, borrowing records, and user management
- Built a full stack system using Laravel and Livewire with real time UI interactions
- My contribution: implemented major features as part of a team, including the database schema and core inventory/borrowing logic

ACHIEVEMENTS

- CCS Dean's Lister (2022 to 2024) at USPF
- 3rd Place, HackEstate Hackathon Competition (PropTech Filipino Homes)
- 2nd Place, Hackathon Competition, CCS Days at USPF 2023
- Best in Logo and Most Promising, Hackathon Competition 2023
- Represented USPF in the CESAFI Computer Quiz Bowl 2025
- 2nd Runner Up & Best in Collaborative Catalysts, Philtech Innovathon 2026
- Top UX Interface, PropTech SinulogFest Hackathon 2026
- Level 3 (Competent) Achiever, TOPCIT Examination

CERTIFICATIONS

- NCII in Computer Systems Servicing — Certified by TESDA, validating skills in hardware and software troubleshooting and maintenance
- TOPCIT Level 3 (Competent) — Test of Practical Competency in IT — Recognizes practical IT skills across software development, algorithms, database management, and system design
- JavaScript 101: Learn JavaScript from Scratch — MISTCONNECT (PRC Accredited CPD Provider) — 8 hour training via Zoom (July 8 to 9, 2023) covering JavaScript fundamentals: variables, operators, control flow, loops, functions, and arrays
- SAP Advanced Business Application Programming (ABAP) Participation — Accenture Technology Academy
- Google AI Essentials (via Coursera) — Foundational program covering practical applications of Generative AI, prompt engineering, responsible AI practices, and productivity techniques using AI tools
- Master Machine Learning & Deep Learning with Python and AI — Udemy, Instructor Waqas Khan, Completed June 14, 2026 (22.5 Hours) — covering Machine Learning Fundamentals, Deep Learning & Neural Networks, Python for Artificial Intelligence, Scikit-learn, NumPy, Pandas, Model Training & Evaluation, and AI Applications
